About

I am a Computer Networks undergraduate with an interest in both networking and full-stack development. I am currently learning and improving my skills in networking concepts and web development technologies through academic and personal projects. I have hands-on experience in web development and enjoy building efficient and user-friendly applications. I am a quick learner seeking an internship to apply my skills in real-world projects and grow my career in IT.

Education

BSc (Hons) Computer Networks , NSBM Green University	2025 – Present
Diploma in Psychology , ISTS (IVETA)	2023
G.C.E Advance level , B/ Passara Tamil Maha Vidyalayam	2022

Technical Skills

Networking Fundamentals LAN, WAN, TCP/IP	Routers & Switches Basics
Programming Languages JavaScript, Python, JAVA	Cloud & Enterprise IT
Core Concepts Object-Oriented Programming (OOP), RESTful API Development, JWT Authentication, Axios/Fetch API	Databases MongoDB, MySQL
Tools & Platforms GitHub, VS Code, Postman, IntelliJ	Tools React, TypeScript, Vite, CSS, Bootstrap, React Router DOM, Node.js+ Express

Projects

Stall Booking System 🔗, Group project

- Implemented user authentication and role-based access for secure login and admin control
- Built stall listing and real-time booking management with database integration
- Designed a responsive and user-friendly UI to ensure smooth experience for both users and administrators.

Campus Connect Lost & Found System 🔗, Group project

- Developed a web-based Lost & Found Management System (Campus Connect) using Java, Spring Boot, and H2 Database to streamline reporting and tracking of lost and found items in campus environments.
- Implemented intelligent features such as Smart Matching, Priority Ranking, and Claim Validation algorithms to improve accuracy, efficiency, and transparency in item recovery.
- Designed a responsive UI with Thymeleaf, HTML, CSS, and JavaScript, and managed version control and collaboration using GitHub for team development.

StudentHub [🔗](#), *Individual project*

- Built a student management platform to centralize academic resources, announcements, and student activities.
- Developed features for data management, notification, and interactive dashboard interface.
- Developed features for data management, notifications and interactive dashboard interface

Navora-Food Mapping [🔗](#), *Individual project*

- Built a full-stack food and travel mapping platform using Java (Spring Boot), MySQL, and JavaScript to explore restaurants, hotels, cafes, and place with location-based filtering.
- Developed structured backend with place module along with REST APIs for efficient data management and retrieval.
- Designed a responsive and interactive UI with search, category filtering, and smooth navigation for an improved user experience across devices.

ReLoop [🔗](#), *Individual project, Under Development*

- Built a web-based sustainability platform for sharing and requesting reusable items like food, clothes, and household good.
- Developing full-stack functionality using React, Java (Spring Boot), and MySQL with API integration and JWT authentication.
- Designing a responsive UI with smooth navigation and location-based item discovery features.

Certificates

- Introduction to C [🔗](#)
- Networking Basics [🔗](#)

Awards

Participant in Career Preparation Workshop [🔗](#), *Cisco Networking Academy*

Soft Skills

- Communication
- Quick Learner
- Teamwork & Collaboration
- Problem Solving
- Leadership

Languages

- Tamil
- English
- Sinhala

Extra-Curricular Activities

- Participated in Tamil, English essay writing, story writing, poem writing competitions and won many certificates
- Actively involved in school/college literary and cultural programs
- Actively involved in sports activities and won certificate during school events.
